PROFILE SUMMARY

Front-end developer skilled in building scalable React/Next.js applications with strong focus on performance, accessibility, and data-driven UI. Experienced in leading projects end-to-end from design to deployment.

PROJECT EXPERIENCE

Forecastly (April 2025 – May 2025)

A information-rich weather portal with detailed data visualization.

Technology used: TailwindCSS, React.js, Redux-Toolkit, Leaflet.js, Chart.js

- Architected and developed a dynamic weather dashboard that provides comprehensive hourly and daily forecasts.
- Integrated a multi-layer user-interactive GPS based weather map.
- Engineered a data visualization system that processes complex multi-metric data from multiple APIs, presenting temperature, humidity, precipitation and more with a high degree of precision and detail.
